ABSTRACT

Ambulance Booking System

The Ambulance Booking System, SWIFTAID is a web-based platform developed to streamline the process of booking ambulances for emergency and non-emergency medical transportation. The system is designed to simplify communication between patients, hospitals, and ambulance operators. It provides an intuitive interface for users to book and manage ambulance services efficiently. Key features include **user authentication, emergency contact notifications, fare estimation, and payment processing**. This system aims to **minimize delays, improve patient outcomes, and save lives**.

The Ambulance Booking System built in PHP provides a practical solution for managing ambulance services. Its straightforward features, such as ambulance booking, user management, and feedback collection, make it a valuable tool for hospitals and emergency service providers. The system is cost-effective, easy to use, and can be further tailored to meet specific organizational needs.

User

1. Register: Create a new user account.
2. Login: Access existing user account.
3. Book Ambulance: Request ambulance services online.
4. View Booking History: Check past and upcoming bookings.
5. Cancel/Modify Booking: Change or cancel existing bookings.
6. Make Payment: Pay for ambulance services online.
7. Rate and Review: Provide feedback on ambulance services.

Admin

1. Manage User Accounts: Create, edit, and delete user accounts.
2. Manage Ambulance Providers: Add, edit, and remove ambulance service providers.
3. Manage Ambulance Fleet: Update and manage ambulance availability.
4. Manage Bookings: Oversee and manage all bookings.
5. Manage Payments: Oversee financial transactions and payments.

Ambulance Service Provider

1. Register: Create a new ambulance service provider account.
2. Manage Ambulance Fleet: Update and manage ambulance availability.
3. Update Availability: Inform system of ambulance availability.
4. Manage Bookings: Accept, reject, or cancel bookings.
5. Update Patient Info: Record patient medical history and information.
6. Communicate: Interact with users and admin.
7. Receive Payments: Get paid for services rendered.
8. View Payment History: Check payment records and invoices
